Category Name Processing (DPS) Design

Actionee ECS

Sub Category Interfaces

Related RIDs

Subcategory ID

Subject Availability of instrument command loads.

## Description of Problem or Suggestion:

No mechanism has been demonstrated which permits direct access by a PGE, in the processing environment, of the instrument command loads generated at the EOC. This information is needed by some PGEs to steer PGE processing as well as confirm/validate contents of level 0 datasets.

## Originator's Recommendation

Modify SDPS to enable complete and convenient access by PGEs to EOC generated command loads associated with the acquisition of level 0 datasets. A disk file access or toolkit access is acceptable. Preprocessing may be required to parse out the relevant information.
